

I am a listener and supporter of K-LOVE radio, a station which utilizes translators in many areas. My understanding is that an initiative is underway to expand the use of LPFM stations which could have the effect of forcing many of these translators off the air. This would impact me and hundreds of thousands of other K-LOVE listeners, not to mention listeners to other stations that use translators.

K-LOVE is an important part of the community as it provides positive programming and information about community events of interest to me. K-LOVE has nearly 200 stations across the country that could potentially be impacted by this initiative. Please realize the scope of this decision and reconsider.
